

# BORDERLAND KEEP

## DELUXE EDITION

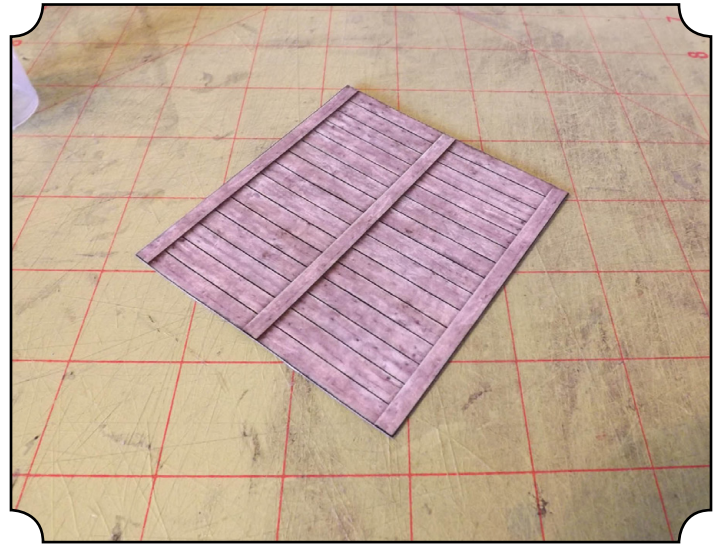

### READ THIS FIRST

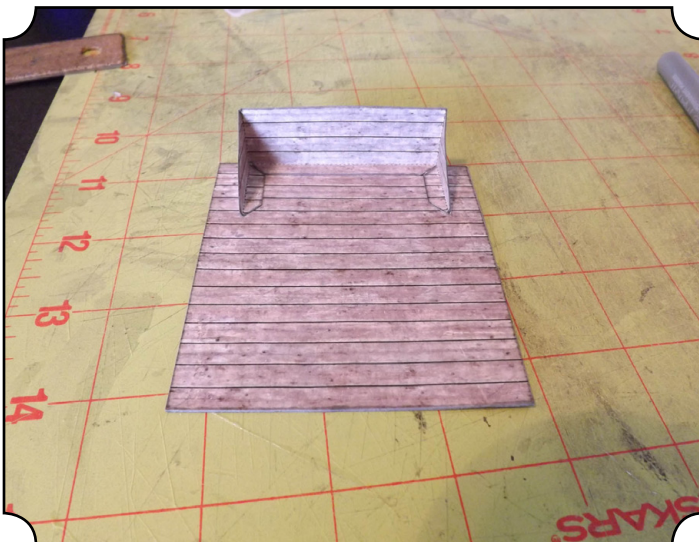

This is NOT a complete model, it requires parts from the BORDERLAND KEEP: Deluxe Edition to complete.

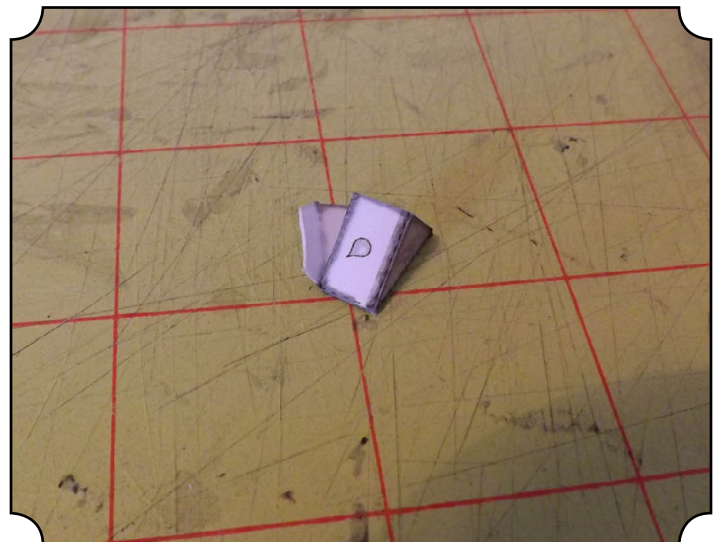

1: Cut and test fold the two bridge pieces and the small stand (yes, you need to build both bridge pieces.)

2: Fold and glue the two bridge pieces in half.

3: For the 'closed' version, glue the small 'stand' to the back of the main bridge piece.

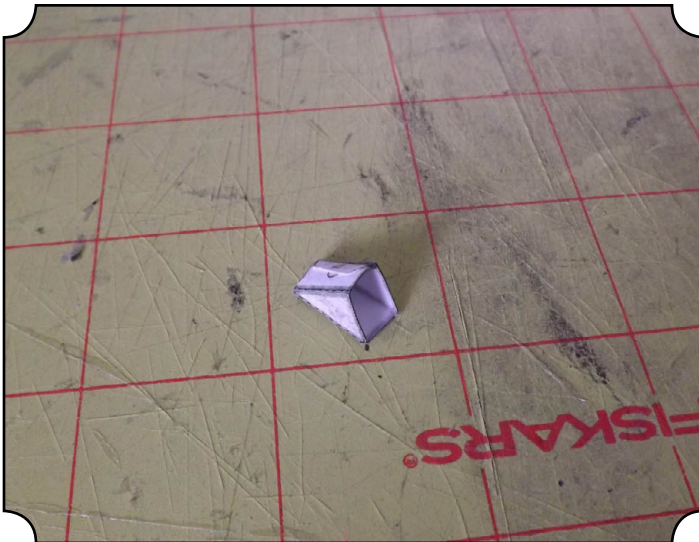

4: Begin gluing the chain openings by gluing the top small tab first.

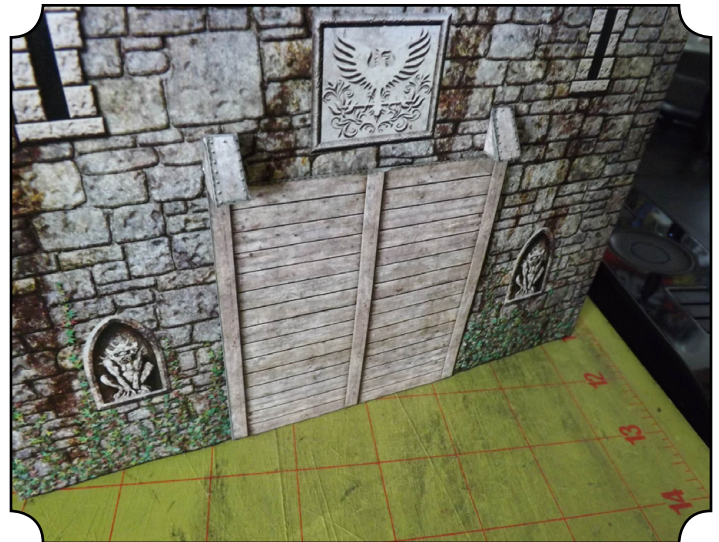

# BORDERLAND KEEP

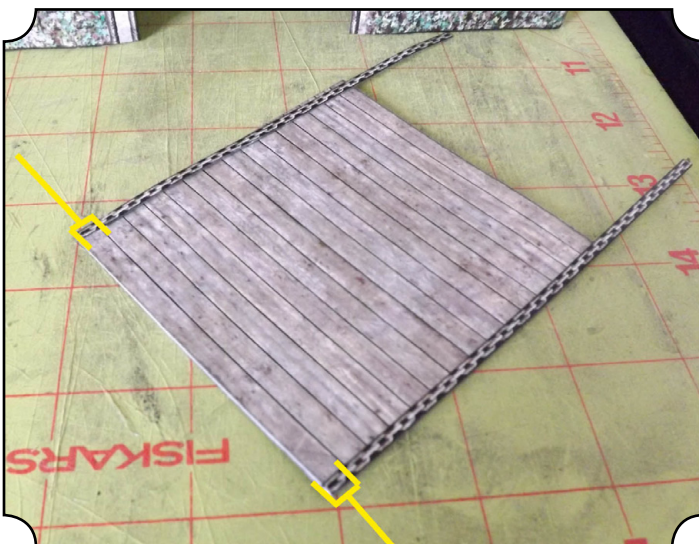

## DELUXE EDITION

5: Finish by gluing the long rear side tab next.

6: Place the 'up' bridge in position, and use this as a guide to glue the chain openings in place (they align with the side edges of the bridge.)

7: Glue the chain to the 'down' bridge piece. ONLY APPLY GLUE TO THE VERY FIRST 'LINK' OF THE STRIP (shown in yellow.)

8: To display the open drawbridge, simply place the bridge in front of the gatehouse with the chain ends inserted (but not glued) into the chain openings.
