

LOST REICH

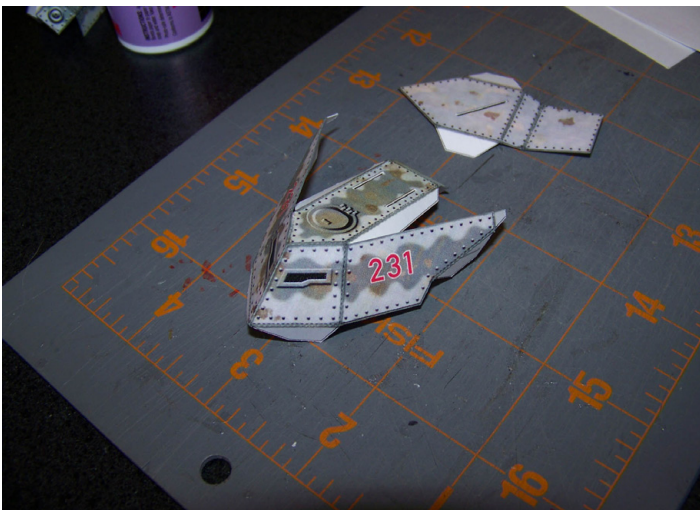

Skorpion Ausf I A Kickstarter Exclusive!

Step 1: Cut and score the cockpit (Parts B1, 2 & 4). You should also edge all pieces at this time because markers will not always color over areas with glue.

Step 2: Begin gluing one of the front two tabs of the side body and top section as shown.

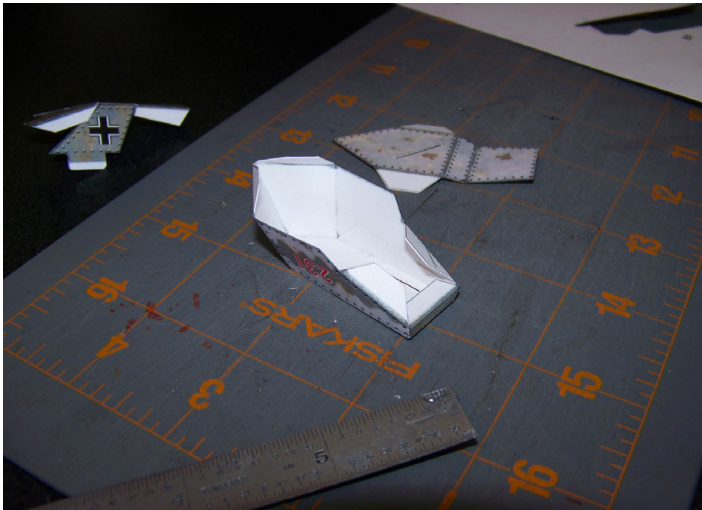

Step 3: Glue the other front top tab.

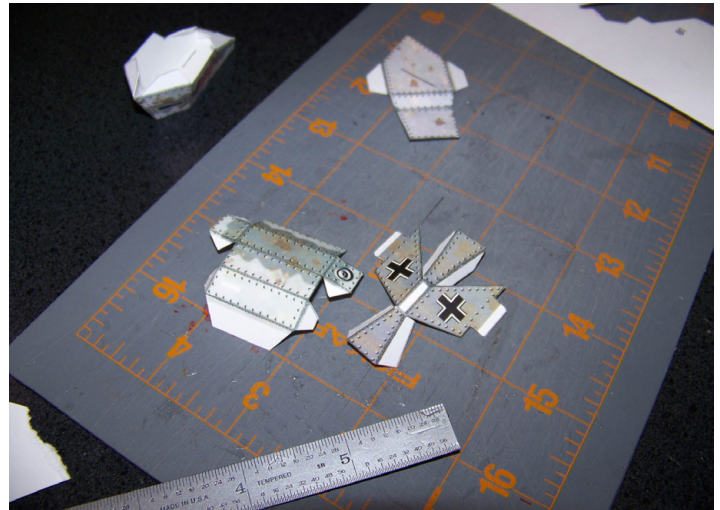

Step 4: After Finish gluing the top piece into place.

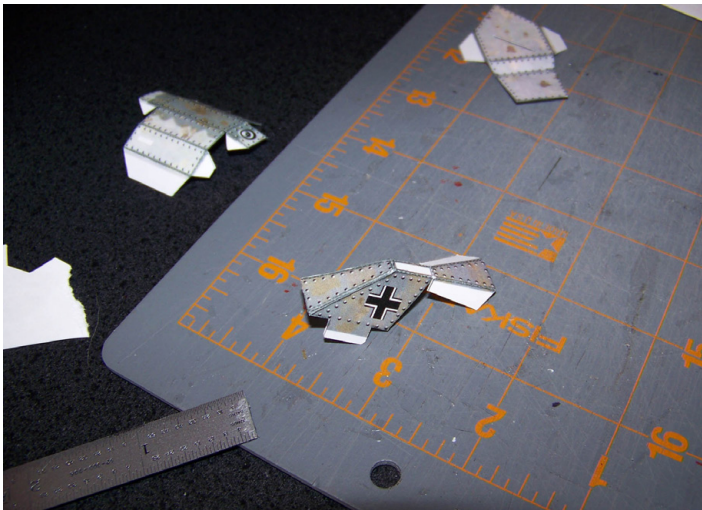

LOST REICH

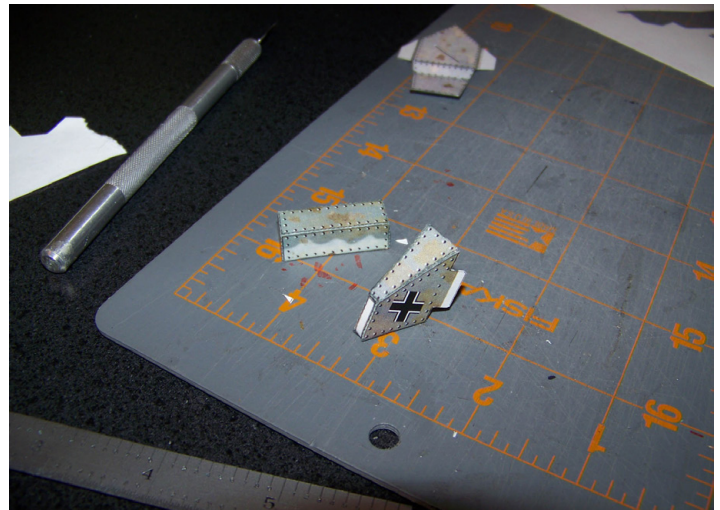

Step 5: Glue the rear flap into place.

Step 6: Cut, score and edge the weapon pylon and gun (Parts B3 & 5).

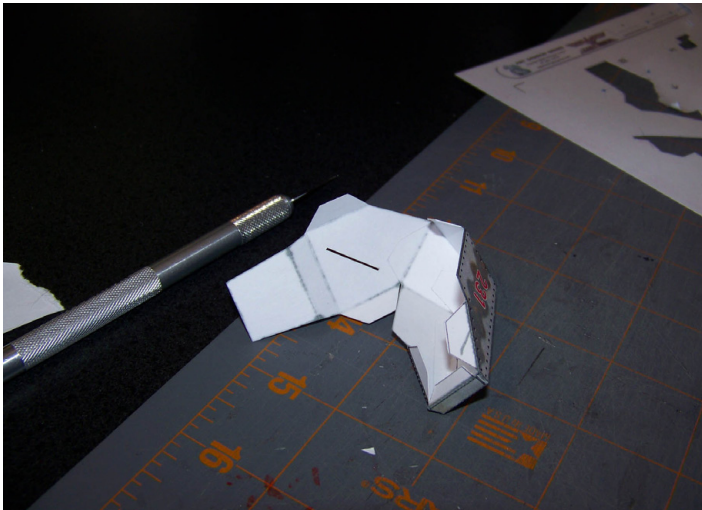

Step 7: Glue the front two tabs of the pylon.

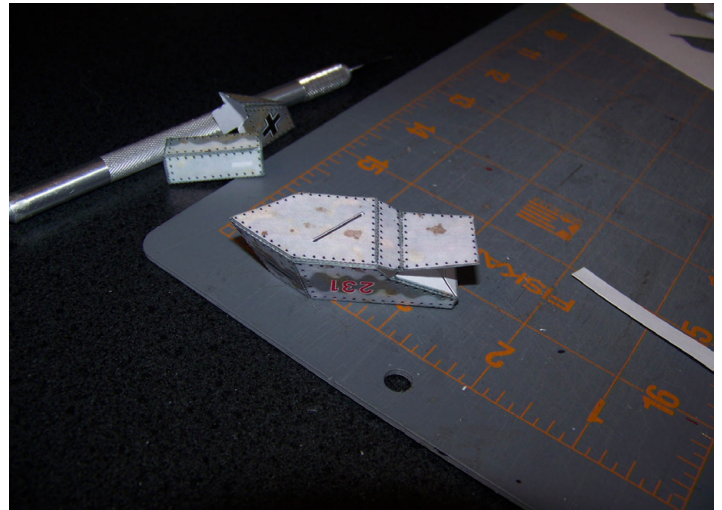

Step 8: Glue the rear flap of the pylon, then glue the gun housing into a box shape as shown above.

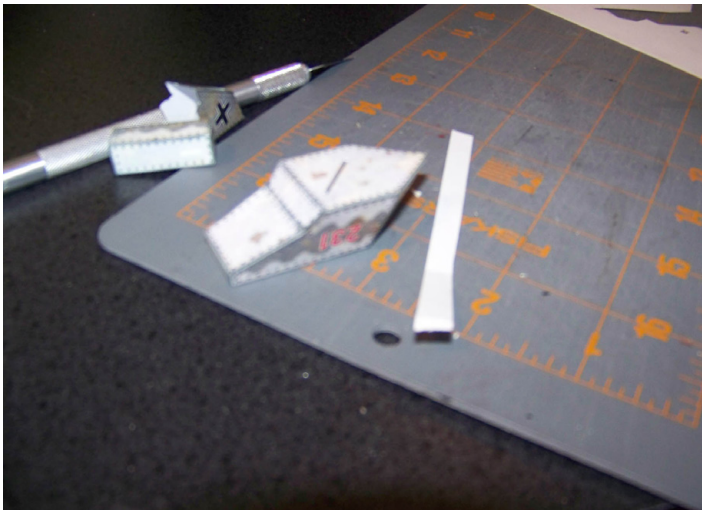

LOST REICH

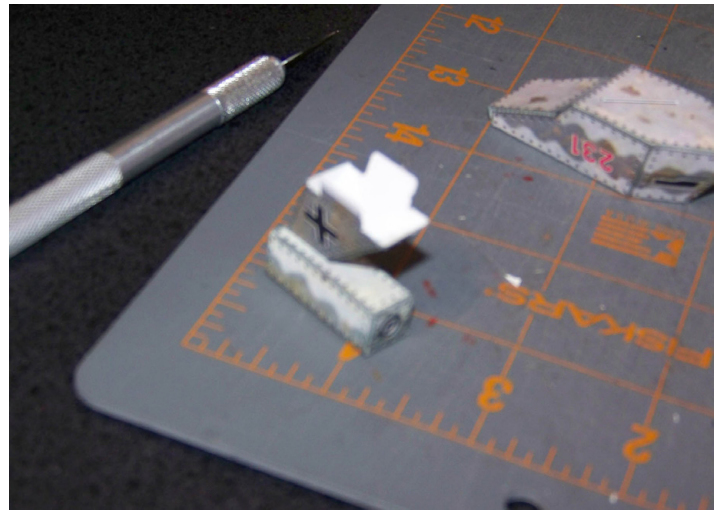

Step 9: Begin gluing the bottom piece to the main body, starting with one of the front two tabs.

Step 10: Continue gluing the other front tab and the two side tabs.

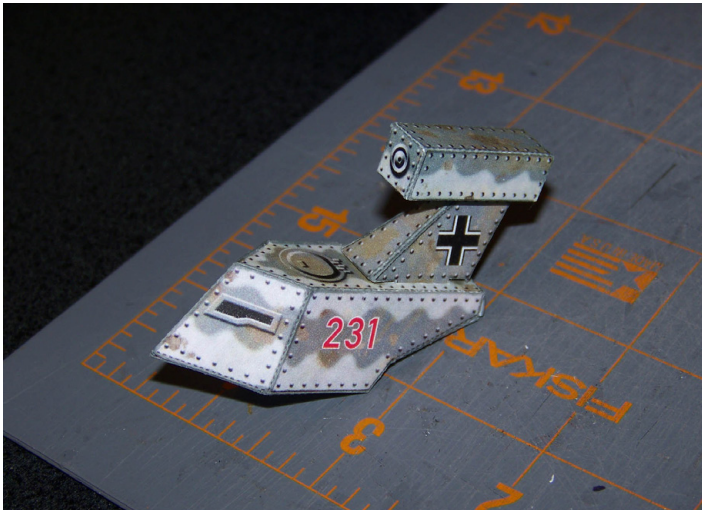

Step 11: Finish by gluing the bottom rear flap.

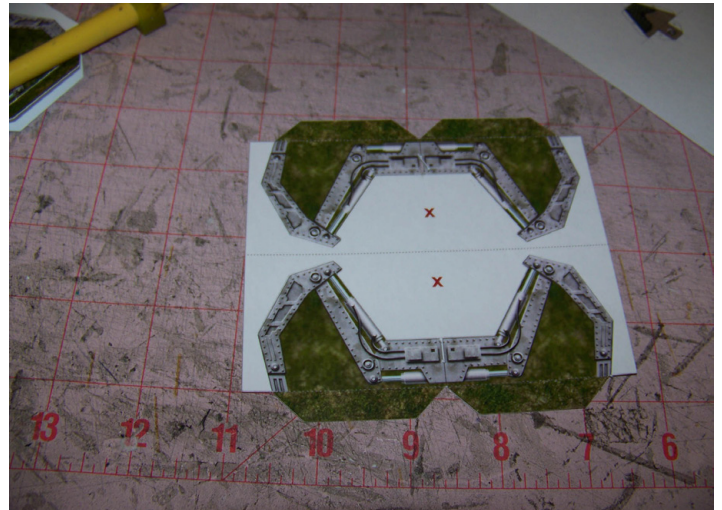

Step 12: Glue the gun housing to the pylon as shown.

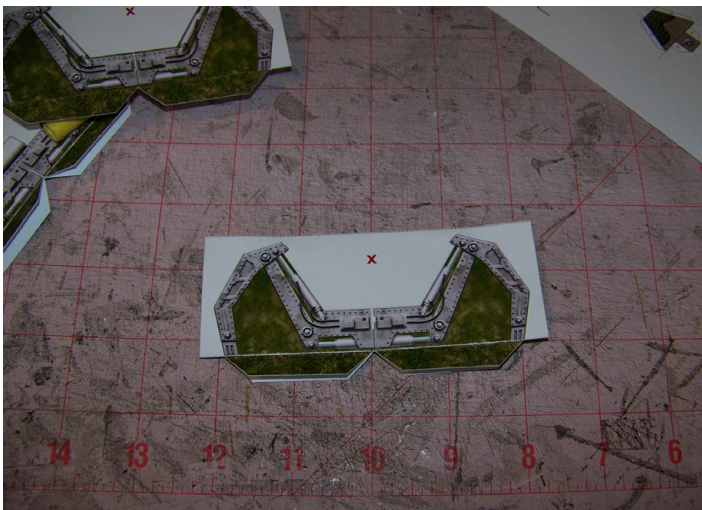

LOST REICH

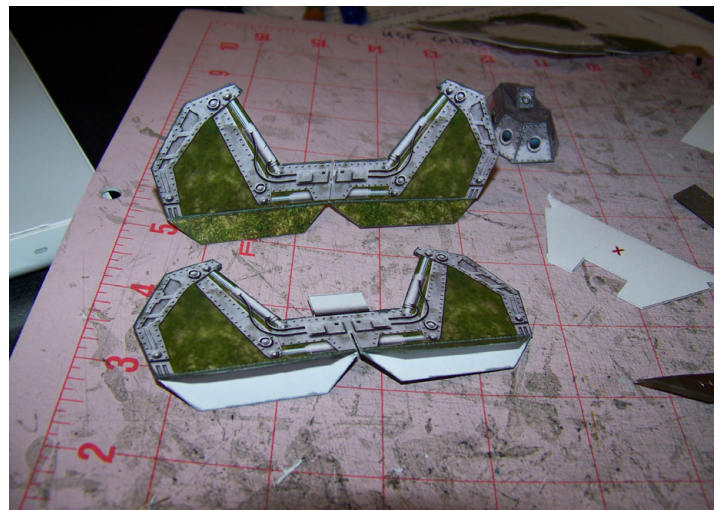

Step 13: Glue the weapon assembly to the main body.

Step 14: Cut and score the legs as shown above.

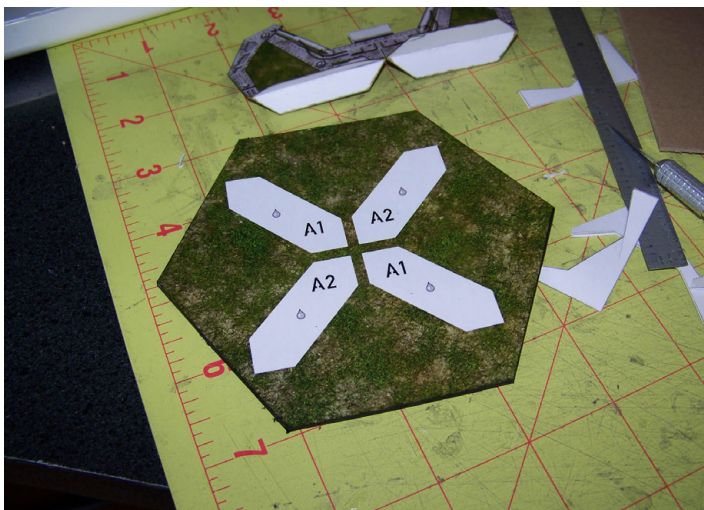

Step 15: Fold and glue in half, being careful not to glue the bottom tabs together (these fold outward away from each other.)

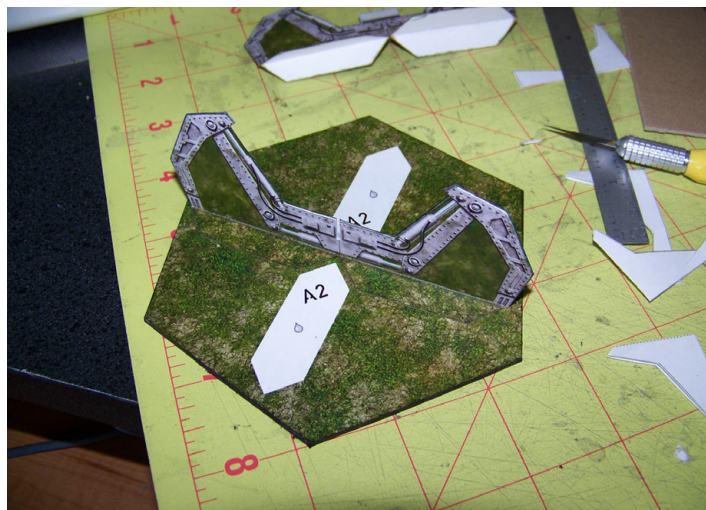

Step 16: Finish by cutting away the excess white areas.

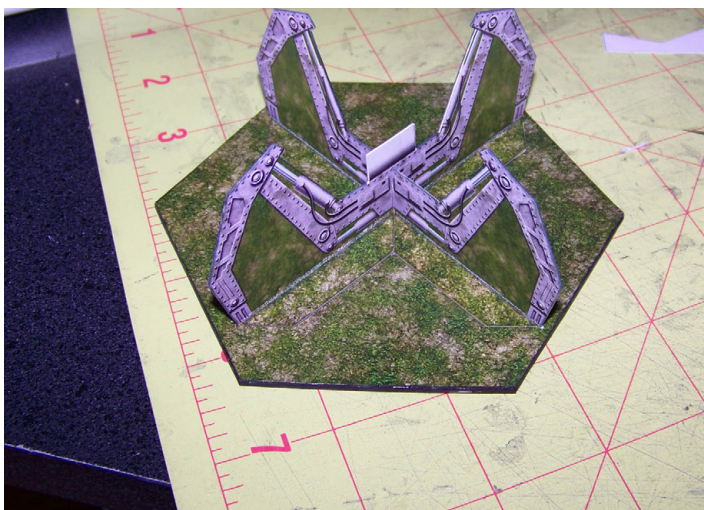

LOST REICH

Step 17: Glue the base to a scrap of cardboard and cut out.

Step 18: Glue leg A1 to the appropriate space on the base.

Step 19: Glue leg section A2 over A1 as depicted above.

Step 20: Place the cockpit on top of the legs. You have the option of not gluing it so you can swap out different cockpits with different numbers/camo schemes as desired.
